

# INDUSTRY 4.0 WIP AUTOMATION

## Empowering Productivity With MDT's IoT Solutions

### Industrial 4.0 WIP Automation

Industry 4.0 is the current trend of automation and data exchange in manufacturing technologies. It includes cyber-physical systems, the Internet of things and cloud computing.

Industrial 4.0 Work In Progress (WIP) Automation stands out with the aim of giving the best business improvements and user experiences by Empowering Productivity with MDT's IoT Solutions.

Industrial 4.0 WIP Automation is a platform where Work in Progress Levels are recorded and can be monitored in real time. Streamline Identification, Authentication & Tracking Procedures are one of the key features of this platform.

This platform is also the best and fastest way to distinguish production lots, saving time and resources. In relation to that, Industrial 4.0 WIP Automation also helps reduce just-in-time delivery risks by proactive supply chain management.

Real-time information on Work In Progress Levels

INDUSTRY 4.0 WIP AUTOMATION

Track and locate items and batches

Reduced just-in-time delivery risks by proactive supply chain management
